FEATURE HIGHLIGHTS

Rotax® 900 ACE™ Turbo engine

With a Rotax-built turbocharger specifically designed for the 900 ACE engine, riders get the technology they love with the reliable, powerful performance they demand in one advanced engine package.

1.25 in. Ice Ripper XT track

A derivative of the RipSaw † track with carbide studs embedded in track lugs for added grip in icy conditions.

Air Ride rear suspension

Tailors the ride for load or trail conditions via a rear air spring and an onboard compressor. Five preload settings are selectable on-the-fly via a handlebar rocker switch.

7.2-in. wide digital display

All-digital LCD gauge with customizable display with flatter viewing angle provides riders with preferred info that's easy to see sitting or standing.

Adjustable Pilot™ TS skis

Radical concept enables the rider to literally dial in the amount of ski bite for conditions and riding style in seconds. A knob adjacent to the ski leg raises or lowers the ski runner – fully extended for very aggressive bite. There are 20 settings over a .5 in. / 12.5 mm range.
